LIANGTI DAI

Centre of Computational Biology, MRC Weatherall Institute of Molecular Medicine, University of Oxford

Email: liangti.dai@rdm.ox.ac.uk

RESEARCH INTERESTS

Computational Genomics; Bioinformatics; Statistical Inference; Machine Learning

EDUCATION

University of Oxford, England, U.K.   Sept.2018-
DPhil student, Interdisciplinary Bioscience Doctoral Training Partnership
Specialization: Computational Genomics · Machine Learning

Nankai University, Tianjin, China   Aug.2014-Jun.2018
B.S., Biological Sciences

RESEARCH

Statistical modelling and machine learning for next-generation sequencing data   Jul.2019-
DPhil research · Supervisor: Gerton Lunter
· Developed a model-based algorithm for high-resolution peak calling for ATAC-seq alignment data.
· Explored the application of topic modelling on single-cell ATAC-seq data for dimensionality reduction and regulatory genomic element identification.
· Integrated gene expression information with deep convolutional neural networks to predicted tissue-specific chromatin accessibility from DNA sequences.

Pipeline construction for single-cell ATAC-seq data analysis and visualization.   Mar.2020-
Collaboration
· Constructed an end-to-end pipeline for single-cell ATAC-seq data processing for high resolution analysis with the aim to detect rare regulatory elements and cell types.
· Created a flask application as an interface for navigating through the pipeline and assisting with data visualization.

Exploring transmission dynamics modelling of COVID-19 using ComoModels   Mar.2021-
· Contributed to the development of an R package (ComoModels) of compartmental epidemiological models for understanding complex aspects of COVID-19 transmission. (Collaboration)
· Developed a user-friendly shiny web application accompanying ComoModels for model demonstration and parameter exploration.

OTHER ACADEMIC ACTIVITIES

Lecture Caption Editor   2021
· Mathematical Biology; Medical Statistics
Teaching Assistant   Nov.-Dec.2019
· Modelling and Scientific Computing; Essential Mathematics

SKILLS

Python, R, Pytorch, Next-generation sequencing analysis tools

AWARDS

· Honors graduate, Nankai University   2018
· Gold medal, International Genetic Engineering Machine Competition (iGEM)   2016
· Poling Outstanding Academic Award, Nankai University   2015-2018
